WORK EXPERIENCE

● Front End Developer Intern

TIIDELAB   April 2023–Dec 2023

- Wrote code in various languages, including HTML, CSS, Tailwind, JavaScript, and React.
- Collaborated with a team and actively participated in a variety of projects, helping to design the front end of websites.
- Built real-world projects which include an attendance tracking website that helps organizations and schools to monitor the performance of their workers and students
- Worked with a team to develop an electronic health record system designed to store patients' medical records and manage appointments. Participated in the development of the website's user interface (UI) and the integration of its functionalities.
.

● Data Analyst

SAN HOSPITAL AND MATERNITY HOME   Sep 2017- Present

- Optimized data collection procedures and generated reports on weekly and monthly basis.
- Performed detailed analysis, including income statements, balance sheets, and cash flow statements, to evaluate company performance and identify areas for improvement.
- Conducted ad-hoc analysis and special projects as assigned, demonstrating strong problem-solving and analytical skills.
