

SANUSI RASHEED

FRONTEND DEVELOPER

[in LinkedIn](#) | [Portfolio](#) | [Email address](#) | [Github link](#)

PROFESSIONAL SUMMARY

Motivated, team-oriented frontend developer with 2 years of experience delivering impactful web solutions. Eager to grow and add value to a team by leveraging a broad skill set and solid technical knowledge.

SKILLS

Frontend: HTML5 | CSS3 | JavaScript | Typescript
Tools: Git | Github | Figma | Notion

Frameworks & Libraries: Reactjs | Nextjs | Tailwind | Material UI | Redux Toolkit
Soft Skills: Problem-solving | teamwork | communication | leadership | adaptability

EDUCATION

Lagos State University

BSc Biochemistry

02/2019 - 05/2023

First Class Honours (4.54/5.0 CGPA)

WORK EXPERIENCE

Ace Initiative Hub

Frontend Developer

10/2024 - Current

Ace Initiative Hub (AI Hub) empowers brands and large-scale enterprises by developing scalable, high-performance websites that enhance user experience, drive engagement, and support business growth.

Technologies: React.js, NeXtJS, JavaScript & Redux Toolkit

- Worked with a team to develop and scale various web applications, including an electronic health record system that streamlines payment processing, attendance tracking, and healthcare worker recruitment. Also contributed to platforms that facilitate brand-creator collaborations, enhancing scalability and user engagement.
- Integrated core API with Redux Toolkit, improving operational efficiency by 30% and strengthening platform stability, resulting in a 20% reduction in system downtimes.

Headstarter

Software Engineer (Fellow)

07/2024 - 08/2024

An AI-focused Software Engineering Fellowship program aimed at equipping individuals with technical and professional skills through practical projects, hackathons, and career development initiatives, emphasizing AI-driven solutions.

Technologies: React.js, Next.js, Firebase, OpenAI, Vercel

- Collaborated with a team of three in designing, developing, and deploying five AI-driven projects within seven weeks, using React.js, Next.js, Firebase, OpenAI, and Vercel.
- Participated in weekly mentorship sessions with engineers from Google, Y Combinator, Stanford, Amazon, and top venture-backed startups, gaining insights into industry best practices and emerging technologies.

PROJECTS

People in Health Care (PIHC)

Frontend Web Developer

10/2024 - 01/2025

Co-developed PIHC, a healthcare platform aimed at tackling healthcare data challenges in Nigeria by streamlining recruitment, attendance tracking, and payment processing.

- Developed a multi-view web app with customized interfaces for staff, HR, and admin, ensuring a smooth experience for each user group.
- Implemented the front-end using React, HTML5, and Tailwind CSS to create responsive, intuitive, and user-centric interfaces.
- Engineered a scalable API integration to enable efficient data management across multiple pages, utilizing Redux Toolkit for state management and seamless API handling.

HONORS & AWARDS

- **Lagos State University Scholar Award for Academic Excellence:** Issued by Lagos State University
- **Intellect of the Year:** Issued by the Department of Biochemistry, Lagos State University

CERTIFICATIONS

- **Elements of Artificial Intelligence,** University of Helsinki
- **Jobberman Softskills Training,** Jobberman
